

# THE EUGENICS SOCIETY

**OBJECTS:**—To study the influences that may modify inborn human qualities; to formulate and support policies for developing these qualities to the utmost advantage; to promote research on eugenic problems; and to foster a responsible attitude to parenthood.

---

**Conditions of Election to Fellowship.**—Election to the Society's Fellowship is restricted to persons who have made, or might be expected to make, some contribution to eugenics or to the activities of the Society.

Fellows are elected by the Council, but no candidate shall be elected a Fellow unless he has been proposed and recommended by a Fellow.

**Applications for Membership** should be addressed to the Secretary, Eugenics Society, 69 Eccleston Square, London, S.W.1. Members receive THE EUGENICS REVIEW free, are entitled to attend lectures, discussions and general meetings, and have the use of the library. Annual Subscription £2 2s. 0d. per annum.

**Editorial communications and Books and Periodicals for review should be addressed to the Editor.**

Those who are not members can subscribe for the EUGENICS REVIEW. Communications regarding subscriptions should be addressed to the EUGENICS REVIEW, c/o Oliver and Boyd Ltd., Tweeddale Court, 14 High Street, Edinburgh 1.

# THE AMERICAN JOURNAL OF HUMAN GENETICS

A quarterly record of research, review and bibliographic material relating to heredity in man.  
Official Journal of THE AMERICAN SOCIETY OF HUMAN GENETICS

**Editor: Dr. H. ELDON SUTTON**

**Department of Zoology, University of Texas, Austin, Texas 78712**

The editor and his staff of associates will be glad to consider manuscripts pertaining to human genetics. Subscription to THE AMERICAN JOURNAL OF HUMAN GENETICS or information pertaining to subscription should be addressed to Grune & Stratton, Inc., 381 Park Avenue South, New York 16, New York. The subscription price per volume is \$15.00 (\$16.00 outside U.S.A.) A volume consists of 6 numbers. Single numbers cost \$3.00. The first volume was published in 1949. One volume has been published each year since then.

Correspondence pertaining to membership in THE AMERICAN SOCIETY OF HUMAN GENETICS or to general society affairs should be addressed to the Secretary of the Society, Dr. John B. Graham, Department of Pathology, The University of North Carolina, Chapel Hill, N.C. 27515

# HUMAN DIVERSITY

## The Nature and Significance of Differences among Men

KENNETH MATHER

What makes human beings different from one another? Why is it that each of us is unique? Human diversity has been the subject of interest and speculation since the beginning of man. It has been accepted as inevitable and bewailed as unjust; made the basis of reverence and of persecution; attributed to divine creation and to diabolical intervention. It has been traced to heredity and to the environment, to ancestry and to upbringing, often with a gross distortion of the evidence and a perverse interpretation of the conclusions. In this fascinating study Professor Mather looks at the various causes of diversity—environmental, genetical and social; sees how they act and interact; and examines the way natural selection is related to and works on the differences they bring about.

“Professor Mather sets out the various factors making for diversity with great persuasiveness and lucidity. This is a book for the general reader, inasmuch as it eschews a technical vocabulary and uses only a little elementary mathematics, but it is written with authority.”

## PROBLEMS OF RADIATION GENETICS

N. P. DUBININ

Translated by G. H. BEALE

This book gives a concise account of the effects of different forms of radiation on living organisms, and includes a very thorough report of Russian contributions to the subject as well as those of Western workers. Among other topics the author also considers the danger to man of increased amounts of radiation in the atmosphere from radio active fall-out, the hazards to pilots of spaceships from cosmic radiation, and the more positive applications to plant and animal breeding.
